PRECAUTIONS ON MACHINE CARE AND PLAYING THE GAME

1. This Nintendo Entertainment System is a very fine instrument. Keep it away from very high temperature and mechanical shock, at all times. Never disassemble it for any reason.
2. Never touch the terminals with your bare hands or get them wet. This could cause damage.
3. Do not clean the case with solvents of any kind, such as thinner, benzene, alcohol, etc.
4. If you play the game for a long period of time, please take a short rest of 10 to 15 minutes, about every 2 hours, for your health.

It's Bugs Bunny's 50th birthday and a grand celebration has been planned by his fan club. However, his fellow Looney Tune pals are jealous of all the attention that Bugs is receiving. After all, no one has ever given such parties in their honor! It's up to you to guide Bugs to his birthday celebration. To do so, you'll have to avoid the other Looney Tune characters and the contraptions they have unleashed to prevent Bugs from reaching the party.
NAMES OF CONTROLLER PARTS AND OPERATING INSTRUCTIONS:

Only controller 1 is used for this game.

Control Pad: Used to move Bugs Bunny. Use the up and down directions to help Bugs climb ladders. Use the down direction to enter the boulder wells, etc.

SELECT Button: Used to pause the game.

START Button: Used to start the game and to pause the game during play.

A Button: Used to make Bugs jump. Also used to start each round.

B Button: Used to swing the hammer.

HOW TO PLAY:

Starting the Game: When the title screen appears, press START to begin the game.

Read the next few screens to find out about the party. Press the A or B Button to go to the next screen.

The Objective: You begin the game with 3 lives. Your goal is to help Bugs reach the birthday party. To do so, you must avoid or eliminate the other Looney Tune characters and the contraptions. To eliminate a contraption, press the B Button to swing the hammer when you are facing the contraption and close enough to hit it.

If you are caught by one of the contraptions, you will be stunned for a short time. While stunned, you cannot use the hammer. If you are caught twelve times, you will lose a life. The status of your current life is indicated by three hearts in the upper left corner of the screen. Each heart starts out red, turns white, then black and then clear when you are caught by one of the characters or contraptions.
You can also lose a life by falling off the screen. Fortunately, you can obtain an additional heart by hitting the Fireball with the hammer and picking up the heart that it leaves behind. This is easiest to do if you jump on top of the Fireball contraption and then hit it.

Sometimes, you may find useful to hide behind some of the large plants you encounter. Along the way, you should pick up as many carrots as possible. The number of carrots you have picked up is shown in the upper left corner of the screen. The more carrots you have at the end of a round, the more chances you have to earn extra lives during the Bonus Bingo round. When you arrive at the Bonus Bingo round, you can choose 5 numbers by pressing the A Button. Line up enough numbers and you can get extra lives!

Controlling Bugs Bunny:
Use the left and right directions on the control pad to move Bugs. You can use the up and down directions to help Bugs climb up and down ladders. Press the A Button to make Bugs jump. The longer you hold down the A Button, the higher Bugs will jump.

Using the Hammer:
The hammer is useful for eliminating contraptions. To use the hammer, face in the desired direction and press the B Button. The hammer is also useful when you encounter things like a seesaw. You can use the seesaw to jump higher than you would normally be able to. To use the seesaw, stand on one end and strike the other end with the hammer.

Using the Boulder Wells:
The boulder wells are the entrances to secret passageways. To use these passageways, wait for the deadly boulder to disappear and then jump into the well. Next, press the down direction on the control pad and you will appear in another area.

COMPLIANCE WITH FCC REGULATIONS

This equipment generates and uses radio frequency energy and if not installed and used properly, that is, in strict accordance with the manufacturer’s instructions, may cause interference to radio and television reception. It has been type tested and found to comply with the limits for a Class B computing device in accordance with the specifications in Subpart J of Part 15 of FCC Rules, which are designed to provide reasonable protection against such interference in a residential installation. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient the receiving antenna
- Relocate the NES with respect to the receiver
- Move the NES away from the receiver
- Plug the NES into a different outlet so that Control Deck and receiver are on different circuits.

If necessary, the user should consult the dealer or an experienced radio/television technician for additional suggestions. The user may find the following booklet prepared by the Federal Communication Commission helpful:
